

# AT-A-GLANCE

## COMPANY / INSTITUTION

Anand Agriculture University (AAU.IN)

## CHALLENGES FACED

One of the biggest problem that came their way was the lack of proper software for automation of tedious and time consuming tasks at their institution.

All the student records were in paper format, making it extremely difficult to generate insightful reports and make data backed decisions.

With a staff of over 1200 employees, it took them over 7 days to generate payroll with excel sheets which often led to delayed payroll payments.

Students and parents would stand hours in queue to make tuition payments and it became a gruesome task for the fee collection agent.

With no software in place, making purchase decisions for low inventory items became extremely difficult.

The under-developed IT sector and remote location of Anand made it extremely difficult to obtain proper IT support.

## SOLUTION PROVIDED

VCLASSROOMING ENTERPRISE

*"Vclassrooming saved us so much time and money and turned our campus truly digital. Our institution's processes have never been so streamlined"*

- **DR. DHAVAL KATHERIA**  
Director of Information Technology

## RESULT

Vclassrooming helped them automate payroll processes with extensive software customization to tailor the solution to their needs.

With the help of robust fees management system they were able to open multiple counters for collecting fees and automate their invoice generation.

With an integrated inventory & purchase management system, they are now able to track low inventory and Inventory allocations to different departments and employees.

With help of Vclassroomings student management system they were able to easily import data in to the system and have a 360 degree view of their academic standings and tuition payments.

Vclassrooming team conducted on-site training sessions to get them up to speed and well equipped to understand and use the solution to their advantage.
